Amazon Ads Account Connection Guide

Overview

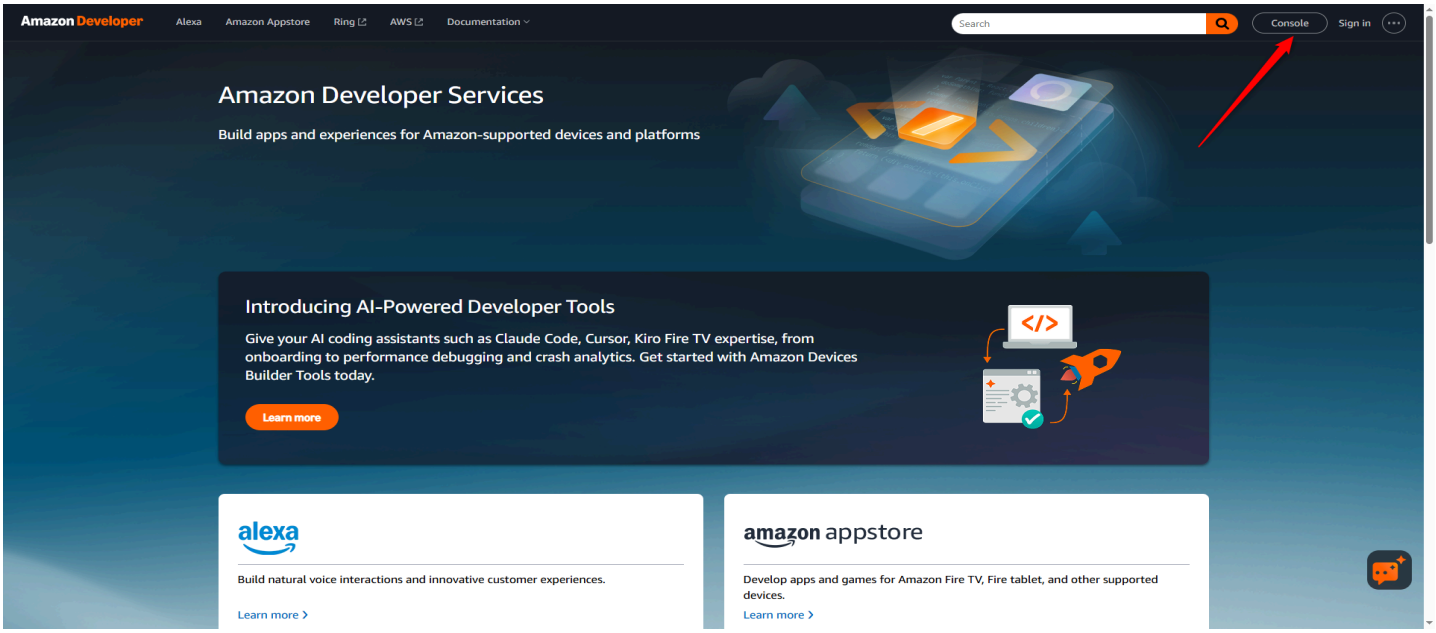

Follow this walkthrough to successfully link your Amazon Advertising credentials with the AdvertiseIQ platform. It is important to perform the following actions sequentially as outlined below.

Prerequisites

Ensure you have an active Amazon Developer account and administrative access to the Advertising dashboard.

Navigate to the URL:

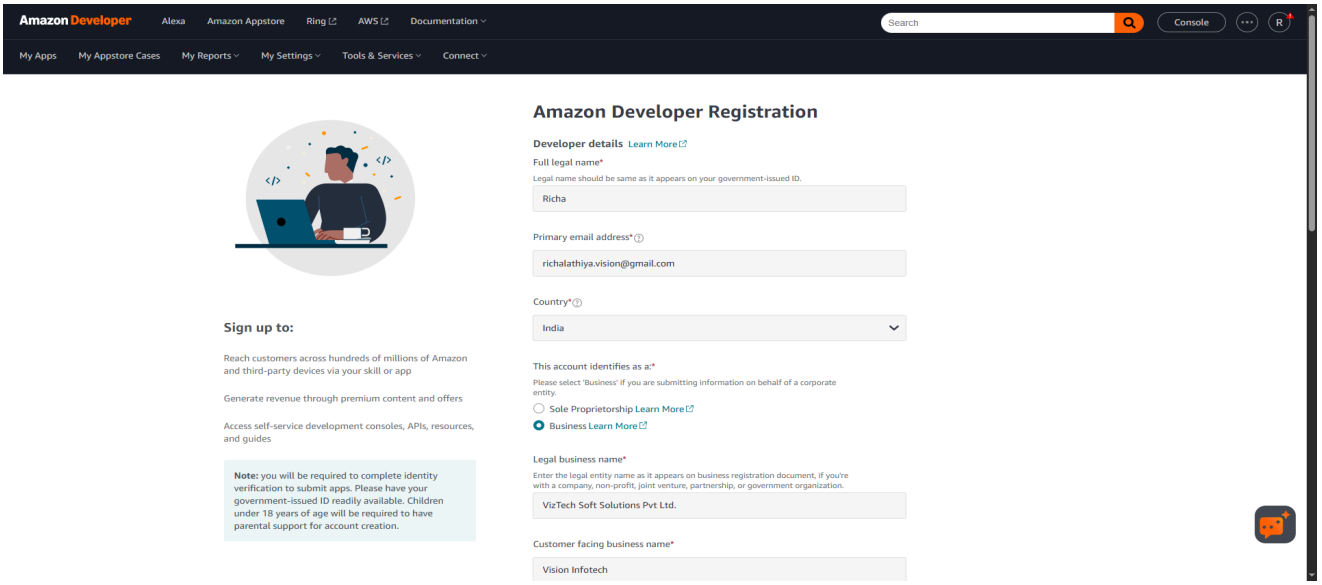

1. https://developer.amazon.com/
2. Click on the console button.
3. Login with your Amazon credentials.

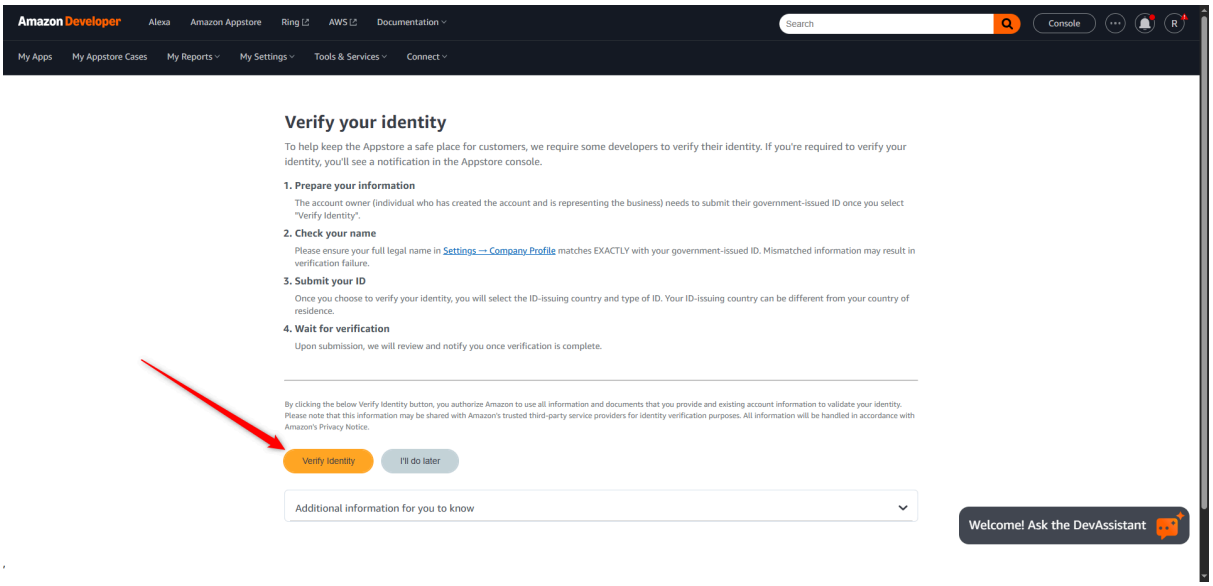

Note: Once logged in, proceed to the Advertising dashboard to complete your connection setup.

Registration Steps

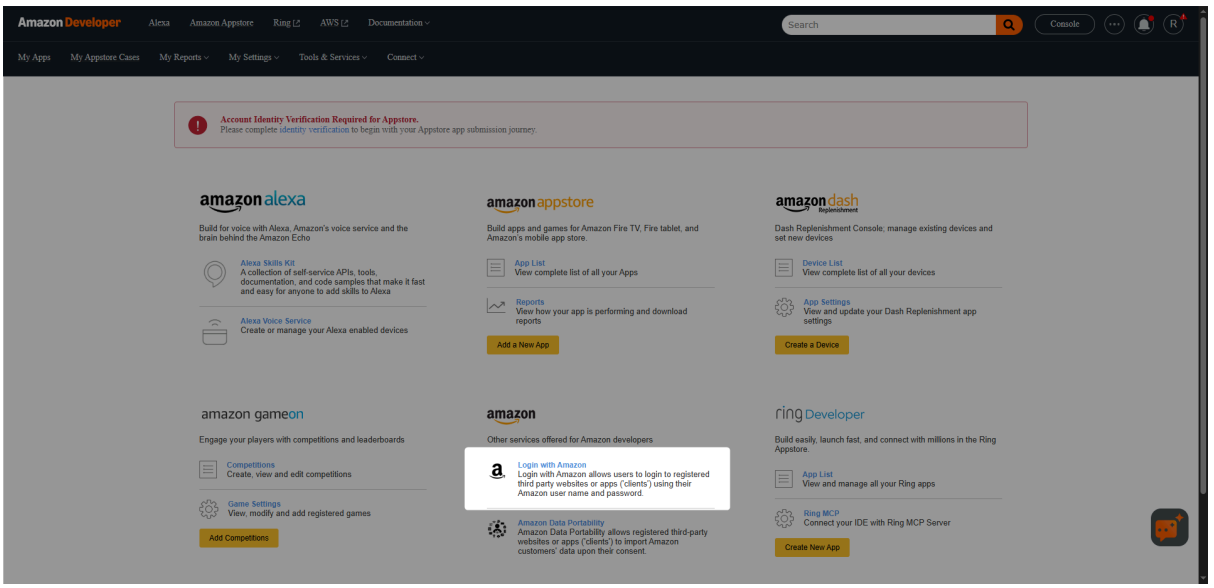

4. Register your Amazon Developer account by providing the required details.
5. Select "Business" as your account type and enter your business information.
6. In the checkboxes, select the "Other" option, check the agreement box, and click "Agree and Continue."
7. Ensure that your customer-facing business name does not contain any spaces.

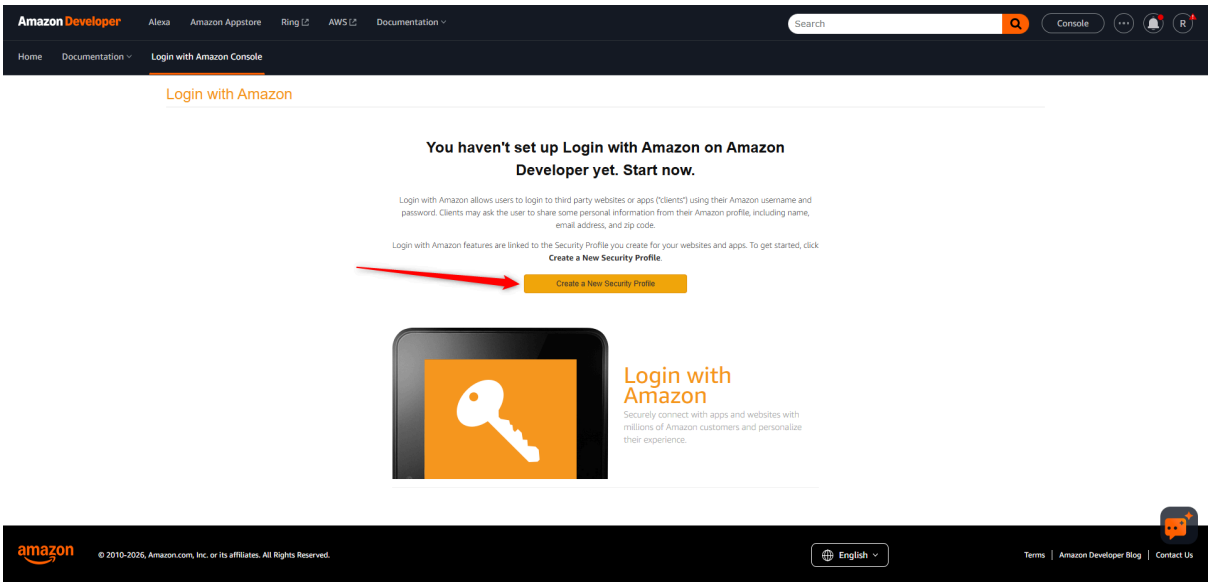

8. Complete the verification process before proceeding.

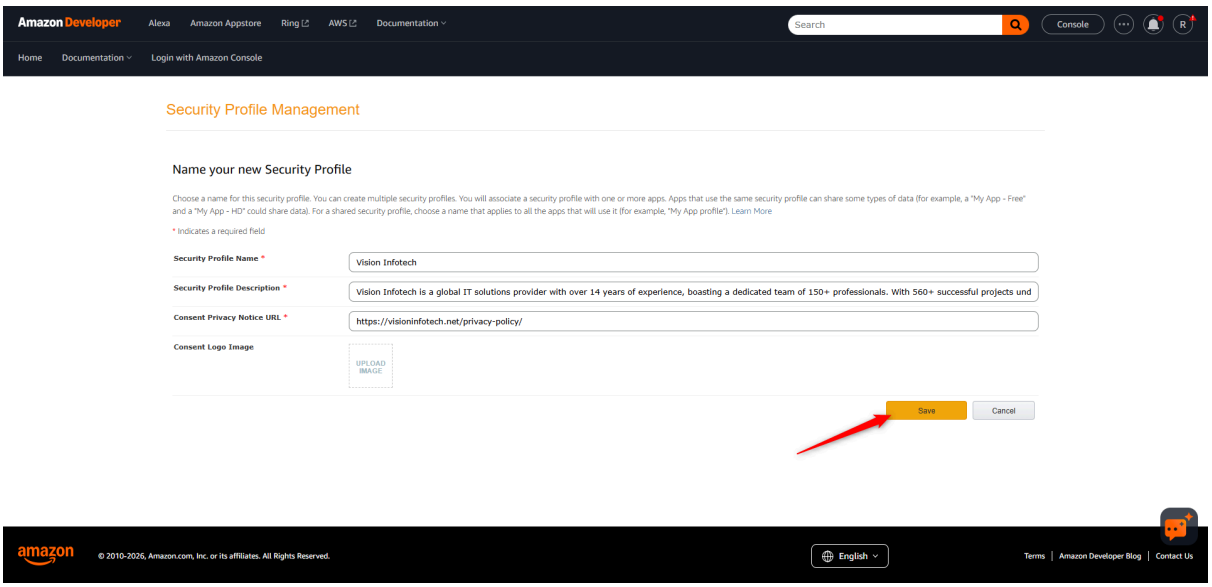

After completing the verification process, you will be redirected to the screen shown below. Click the ***Login with Amazon*** option to continue.

On the next screen, click the ***Create a New Security Profile*** button to create your security profile.

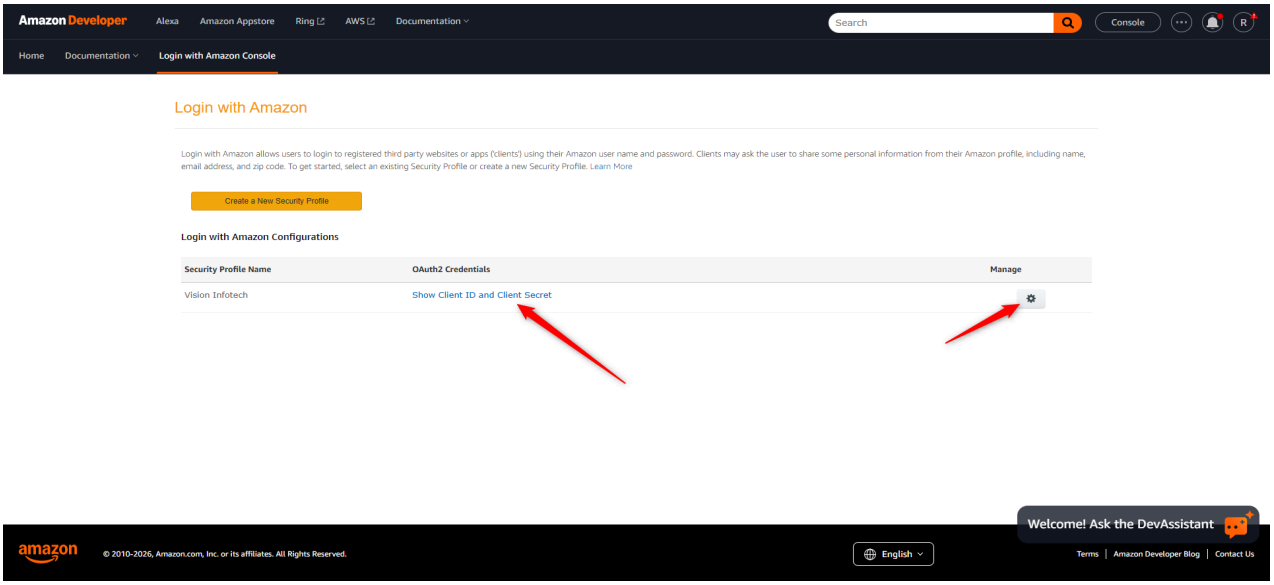

- Complete the required details in the form, as shown in the image below.
- Upload your company logo in the **Consent Screen Logo** section.
- Click **Save** to save your Security Profile.

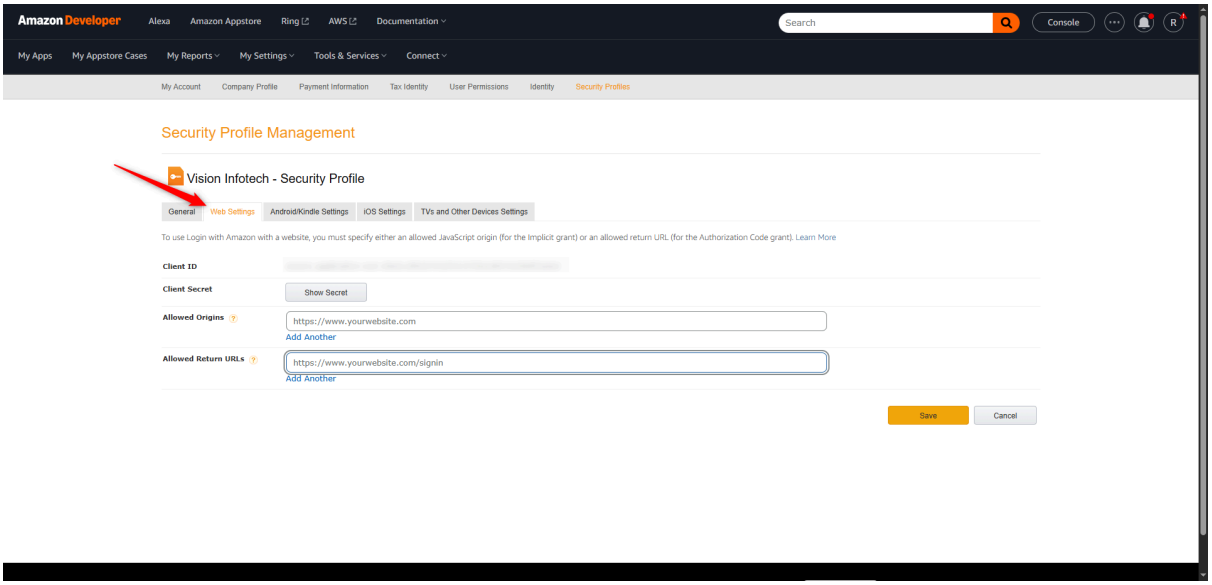

After saving your Security Profile, you will be redirected to the screen shown below.

Click the ***Show Client ID and Client Secret*** button to reveal your credentials.

NOTE: ***Copy both the Client ID and Client Secret and store them securely, as you will need them in the following steps.***

Next, click the **Settings** (⚙️) icon under the **Manage** column, as shown in the image above. This will open the **Web Settings** page shown below.

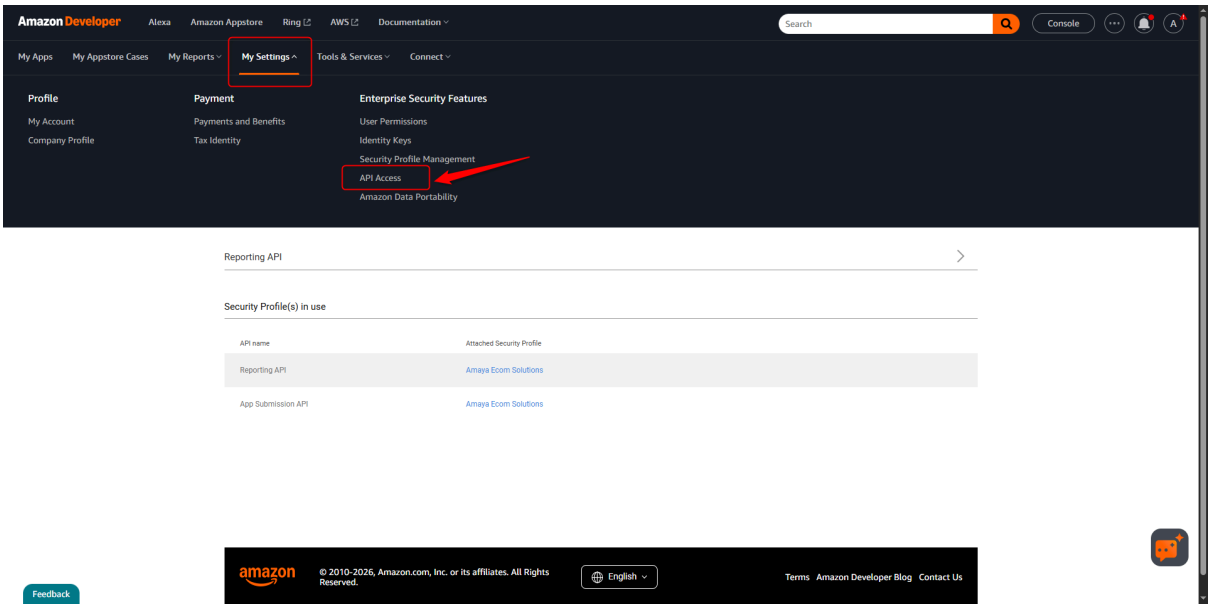

On this page, you can also view your Client ID and Client Secret if needed.

Configure the following settings:

- **Allowed Origins:** https://api.advertiseiq.co/
- **Allowed Return URLs:** https://api.advertiseiq.co/api/config/amazonCallback

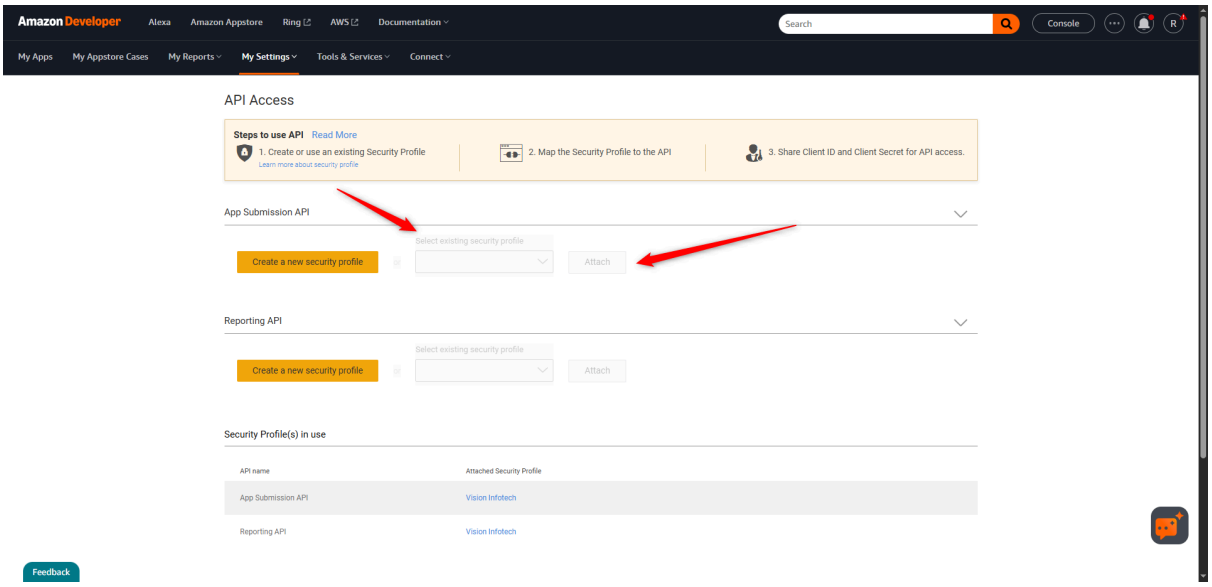

After entering the above values, click *Save* to apply the changes.

After saving the Web Settings, navigate to the *My Settings* tab and select the *API Access* option, as shown in the image below.

You will be redirected to the **API Access** page, as shown in the image below.

1. If this page is not displayed, open the following URL directly:
    - https://developer.amazon.com/apps-and-games/console/api-access/home.html

On the API Access page, expand both the *App Submission API* and *Reporting API* sections.

For each API:

1. Select **Existing Security Profile**.
2. Choose the Security Profile you created from the dropdown list (Company Name that you created before).
3. Click **Attach**, as shown in the image above.

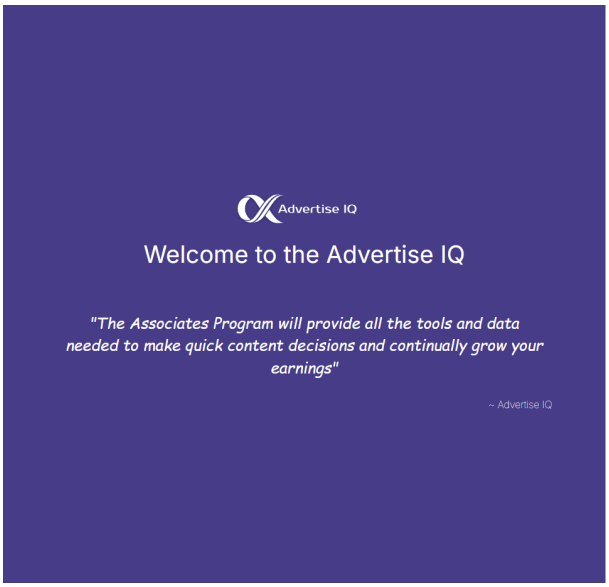

Repeat these steps for both the *App Submission API* and *Reporting API* sections.

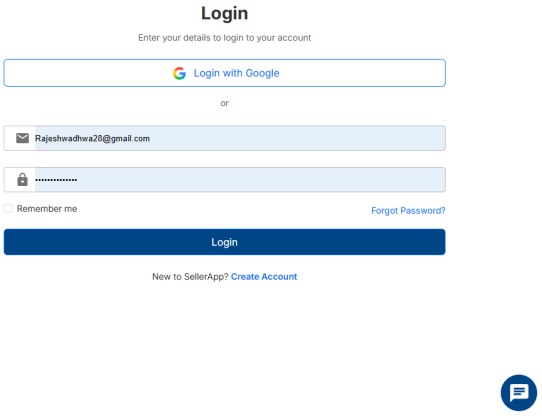

Once you have completed the Amazon Developer configuration, navigate to the AdvertiseIQ application:

URL: https://app.advertiseiq.co/

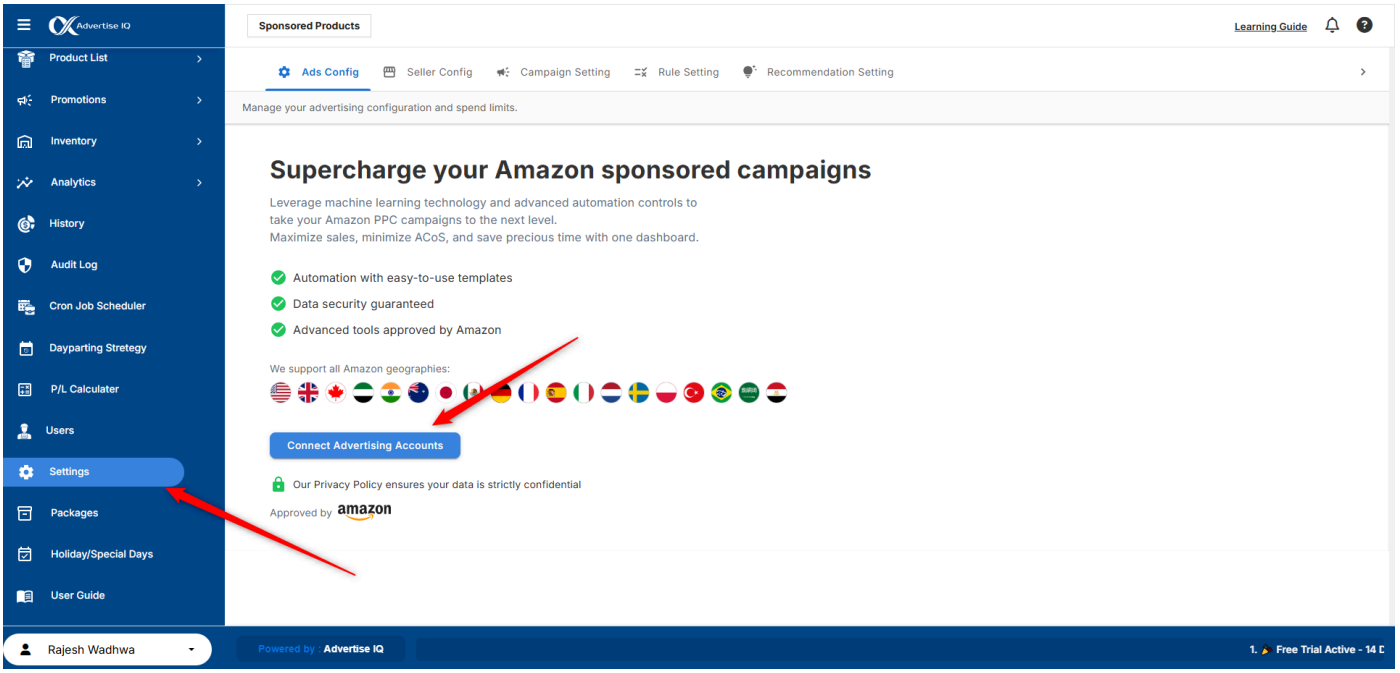

Sign in using the credentials provided below:

- **Email:** Rajeshwadhwa28@gmail.com
- **Password:** Rajeshwadhwa28

After signing in, navigate to the *Settings* page. Under the *Ads Config* section, click the ***Connect Advertising Account*** button, as shown in the image below.

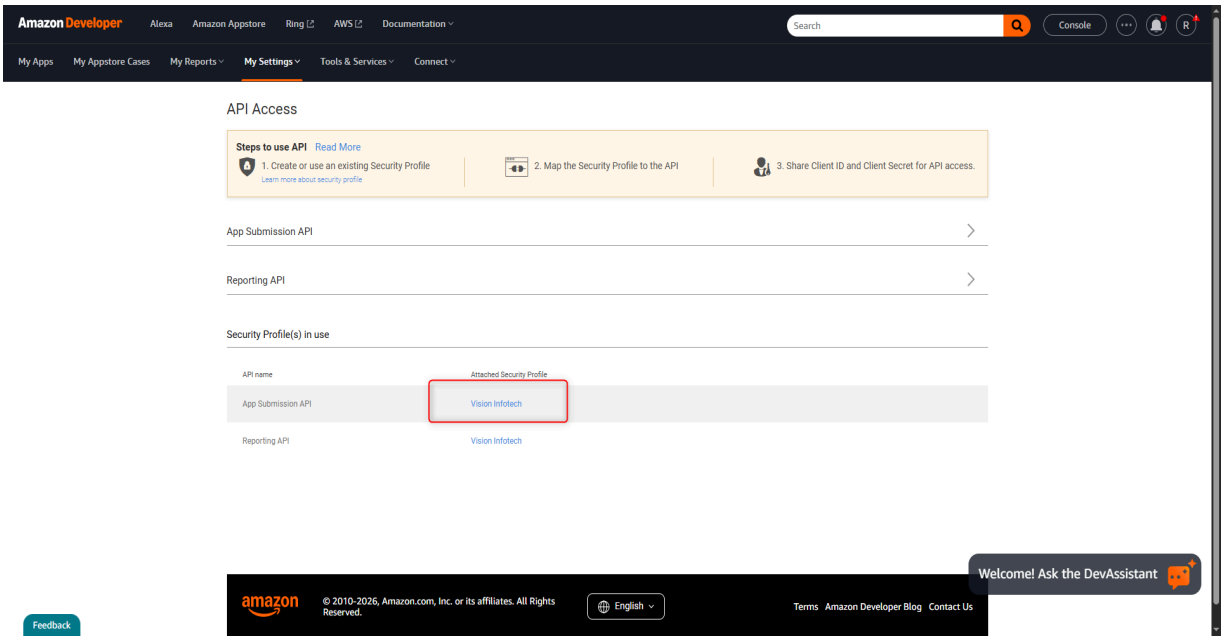

On the *Connect Advertising Account* page, enter the following details:

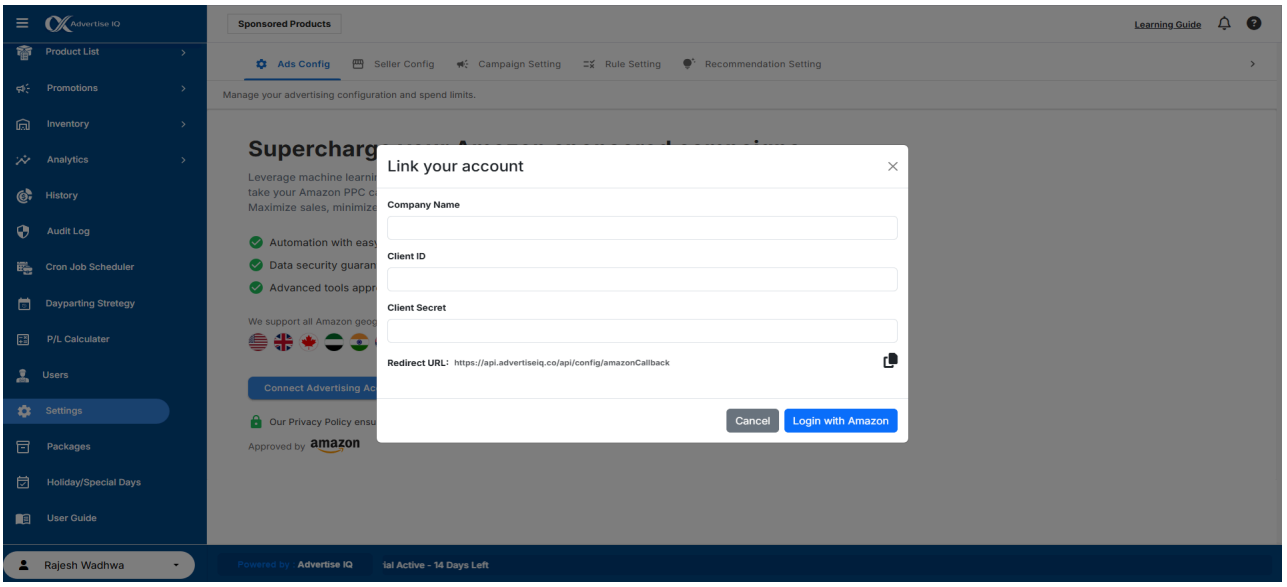

- **Company Name**
- **Client ID**
- **Client Secret**

These are the credentials you saved earlier while creating your Amazon Security Profile.

In case if you did not save your Client ID or Client Secret, you can retrieve them by following these steps:

1. Navigate to the **Amazon Developer Console**.
2. Go to **My Settings → API Access**.
3. Select your attached Security Profile.
4. Open the **Web Settings** page.
5. Your **Client ID** and **Client Secret** will be displayed there.

Once you have entered all the required details, click *Login with Amazon* to continue

Click ***Login with Amazon***. You will be redirected to the Amazon sign-in page. Sign in using your Amazon account credentials and complete the authorization process to connect your Amazon Ads account with AdvertiseIQ.

Once you've completed all the above steps, please let us know so we can complete the remaining setup from our end.

If you have any questions or face any issues during the process, feel free to reach out. We'll be happy to assist you.
